

## 5 Step AI Readiness Assessment

We're living in the era of AI, and whether we're ready or not, the nonprofit sector is under increasing pressure to explore AI solutions.

The potential is huge—AI can automate repetitive tasks, uncover valuable insights, and increase the impact of philanthropic dollars.

Before introducing AI into any workflows, take the time to conduct a thorough survey of your organization's readiness. Here's a five step framework to help you prepare your organization.

- **Data Infrastructure.** Evaluate your data infrastructure. AI requires clean, structured, and accessible data to operate.
- **Technical Capabilities.** Make sure you have the necessary software and IT infrastructure.
- **Staff Resources.** AI adoption isn't just about the technology; it requires administrators, training, and support.
- **Budget Considerations.** Consider the total cost of implementation.
- **Cultural Readiness.** Are your staff and leadership open to implementing and integrating AI?

AI has a role in nearly every nonprofit—but turning potential into impact is up to you. Your leadership is the bridge between possibility and meaningful application.

Since 2005, **Exponent Partners** have been a trusted ally for Foundations and Human Services organizations, working together to deliver radically better impact. We understand your mission's importance, and we're here to help you amplify it.
